# THE BEST PRODUCTS BUILT USING THE BEST PRACTICES.

### THAT'S THE BEST WAY.

Best Way Stone started as a family business in 1965 and we still locally craft our hardscape products using the same best practices to exceed the highest industry standards and customer expectations. All of our pavers and slabs are resistant to slips, de-icing salt, salt water, and chlorine and will not deteriorate from oil or gas spills. Better yet, we back all pavers with our transferable lifetime guarantee.

From our two state-of-the-art manufacturing facilities and our network of dealers across Ontario, Quebec, Michigan, and New York, we're continually finding the better way to support landscapers and homeowners with only the best materials and solid customer service.

#### **WE STAND BEHIND OUR NAME.**

We're a family business, so we're preconditioned to take our work personally. In a world increasingly dependent on automation, we prefer to apply a personal touch to everything we do.

Our products are built using two key ingredients: quality and care. All are manufactured to meet and exceed their respective North American standards set by both the CSA and ASTM.

That quality and care is provided with our transferable lifetime guarantee on the structural integrity of our pavers. You can learn more about our transferable lifetime guarantee on our website: bestwaystone.com

QUALITY AND CARE

100%

## **SOLID GROUNDWORK.**

Being a family-founded and independently owned business keeps us humble and true to our roots. Even as we've grown and expanded to new locations, we've still maintained our flexibility to quickly respond to both market demands and home-owner needs. This allows us to innovate quickly.

We've built production facilities and equipped them with manufacturing technology and our own proprietary processes that are engineered specifically to ensure our products are well-thought, well-designed and well-made.

One of the most common questions we get from customers purchasing hardscape products is knowing how they will wear over time. Our recent technological advancements provide layers of enriched surfaces and colour bringing product aesthetic & performance to the next level.

The DesignLoc® surface refinement technology is a strategic mix design that produces a highly controlled and refined surface offering.

ChromaTec™ protective surface enhancer adds a level of protection that helps resist the threat of stains from foreign elements while enhancing the vibrancy of the coated surface.

# THE ONE AND ONLY GLACIER CREEK

Last year Best Way Stone unveiled our latest colour creation, and it took the industry by storm. Curating the perfect harmony of whites, charcoals and earthen hues, we offer Glacier Creek across multiple product lines.

There is only one true Glacier Creek, and we are proud to help illuminate your outdoor space with this eye-catching favourite. Be sure to see it in person, if you haven't already.

# **2019 LOOK BOOK**

Yes, a well-designed outside space not only adds property value, it creates a sense of joy every time you return home. The past few years have been seeing homeowners find creative ways to build high-impact front entrances and restful backyard retreats that are built to last so they can be used and enjoyed through all the seasons year-after-year. Here are a few of our favourites.

AVARI (GLACIER CREEK) WITH SOHO WALL AND FIREPLACE (GLACIER CREEK)

# DESIGN

SHAPES. SIZES. COLOURS. TEXTURES. PUT THEM ALL TOGETHER TO BUILD YOUR DREAM OASIS.

#### **SIZES**

Combining varying sizes draws attention to key areas in your landscape.

#### **COLOURS**

Lighter colours can make a landscape seem larger, while darker colours make large expanses feel more intimate. Mix the two to create areas of personality and warmth.

## PAVER DESIGNS

#### Design your dream landscape in three easy steps:

- 1. First, start by choosing a primary paver. We have a stone for every taste.
- 2. Next, add an accent. Dark or light? Smooth or textured?
- 3. Finish it off with a border. Give it that final touch.

To help you get started, we've shared a few popular combinations.

Whether you like contemporary, modern, traditional or rustic – we've got you covered.

## HARDSCAPING ACCESSORIES

Best Way Stone has curated a collection of accessories to finish your outdoor space. This series consists only of products we know and trust in our landscape designs – so you can trust them in yours, too.

#### **JOINT SAND**

Specially formulated mixture of graded sand and high-performance polymer binding agent designed for all paver and natural stone joints up to 4"(10 cm). It will remain stable and flexible in the most extreme weather conditions and freeze/thaw cycles when properly installed.

#### Sable Marco

**Evolution Polymeric** 

ADDITIONAL SAND BOMIX PRE-DRIED JOINT SAND

#### **SEALERS & CLEANERS**

#### Seal King paving stone sealer

- $\mbox{\ensuremath{\scriptstyle\bullet}}$  water and a crylic based
- high and satin gloss finish
- efflorescence remover
- · oil and grease remover
- seal grip
- sealer remover

#### Kimbol sealer

- water and acrylic based
- high and satin gloss finish
- efflorescence remover
- oil and grease remover

#### Global Sealer Technologies concrete cleaner

- effectively removes concrete film residue
- best used on non-polished surfaces
- $\bullet$  effective on pavers, concrete and brick
- environmentally safe product
- water clean up

#### **TOOLS, ACCESSORIES & OTHER**

#### ADHESIVES

- butyl tape
- landscape adhesive tubes

#### AGGREGATES

- 1/4" chip
- 3/8" gravel (loose)
- 3/4" crusher run
- 3/4" gravel (bags only)
- brick sand
- concrete sand
- limestone screening

#### CEMENTS

- masonry cement (S)
- portland cement (GU)

#### EDGE RESTRAINTS

- Brickstop aluminum edge restraint
- Brickstop Beast plastic edge restraint
- Snapedge plastic edge restraint

#### **FABRICS**

- construction fabric
- geogrid tie-back
- landscape fabric
- spikes

#### ICE CONTROL

• Britech Ice Melt System

#### **TOOLS & ACCESSORIES**

- brooms • caulking guns
- gloves
- hand tampers
- mallets/hammers
- Night Sight® solar lights
- levels
- plate tampers
- shovels
- string lines
- wheel barrows

#### PRECAST CONCRETE

- parking lot bumber curbs (96"x10"x6") (96"x12"x8")
- simplicity steps (36"w / 48"w / 60"w / 72"w)
- platforms (36"w / 48"w)
- chimney caps • keystones
- splash pads • step risers
- · window sills

#### **SETTING A BASE**

The quality of work put into establishing a solid foundation is vital to the overall performance of your landscape design.

When properly constructed, a solid base foundation helps prevent paver settling, shifting, and water accumulation. Use of edge restraints and jointing sand is recommended as best practice by ICPI (Interlocking Concrete Pavement Institute).

When choosing and installing jointing sand, please ensure to follow the directions given by the manufacturer. To find out more about base preparation and installation practices, visit www.icpi.org.

#### **COLOUR DISTRIBUTION**

When installing stone, we recommend you select a mix of materials from several different bundles to ensure a balanced distribution of surface colour textures and colour mixtures.

Always verify colours and products chosen for your concrete landscape project with your contractor or landscape designer prior to installation. Physical or printed colour samples are only representations of the chosen product. If you notice a discrepancy, notify us immediately before continuing with your project. Full installation is understood as your acceptance of the product's condition.

Maintaining the surface of your concrete pavers is essential to their aesthetic. Sealing your concrete pavers can enhance the colour, but it's optional as our pavers are just as durable with or without the addition of sealants. If you plan on sealing your concrete products, always follow the manufacturer's instructions for proper application.

Unfortunately, even materials as durable as concrete can scratch, chip, or stain if handled incorrectly. When compacting our pavers, ensure that a rubber membrane is added to protect textured surfaces from potential damage. Use a rubber blade when removing snow from the surface of our pavers to prevent surface scratching and damage. Best Way Stone is not responsible for the damage left by the misuse of compaction or snow removal equipment.

#### **EFFLORESCENCE**

Efflorescence is that white, powdery substance that appears on the surface of concrete and it's a naturally occurring process. Efflorescence does not affect the structural integrity or strength of the product and will usually wear off over time - although special cleaners can be used to speed up its removal. For more information visit www.icpi.org.

#### WHERE TO FIND OUR PRODUCTS

Best Way Stone has an extensive network of dealers throughout Ontario, Quebec, and North-East Michigan. Visit our website to find a dealer near vou: www.bestwaystone.com/find-a-dealer

#### **CHOOSING A CONTRACTOR**

Although not required, hiring a qualified contractor makes installing stone a much more efficient and less stressful experience. When hiring a qualified professional we recommend they follow industry standard guidelines.

When hiring a contractor, we recommend collecting project references and samples of previous work. Make sure they offer a comprehensive warranty, and have all the required insurance and licenses. Any contractor will understand the industry standards for installing stone - you can download a copy to these guidelines by visiting www.icpi.org.
