

MODERNA®

- Provides a random pattern with one easy-to-install stone shape
- 7 different false joint designs with 23 unique surface textures
- Herringbone installation provides tight locking random finish
- Runningbond installation increases joint space permeability
- Creates a 16" wide soldier course with no manipulation required
- Available in multiple colour blend options
- Produced locally in Ontario, Canada

UNITS*

16" x 8/12" x 2.75"
405mm x 205/305mm x 70mm

*All units sold and packaged together (above sample of one bundle layer)

ENGINEERING & STYLE

Most permeable pavers are simple in their design, and finished product, but this is where engineering and style combine. The **Moderna®** Paving Stone, a decorative, innovative and versatile paving stone, that provides stormwater control without sacrificing style or design. Following PICP (Permeable Interlocking Concrete Pavement) standards, the **Moderna®** Paving Stone provides a complete system, helping to eliminate runoff and contribute to green building.

ELIMINATING STORMWATER RUNOFF

Independent third party testing has shown the **Moderna®** Paving Stone allows water to infiltrate the surface at a rate up to 3000 in/hr (76,200 mm/hr)*, through a unique interlocking system. This helps prevent stormwater runoff from reaching local areas, parks and streams, and instead helps return the water back to nature, reaching the soil under developed lands.

LONG-TERM SOLUTION

The **Moderna®** Paving Stone is supported by Best Way Stone's paver lifetime guarantee. PICP systems often carry a lifespan of 20-25 years, making the **Moderna®** Permeable Paving system a great long-term solution for our rapidly developing communities.

SAVE ON TIME & MONEY

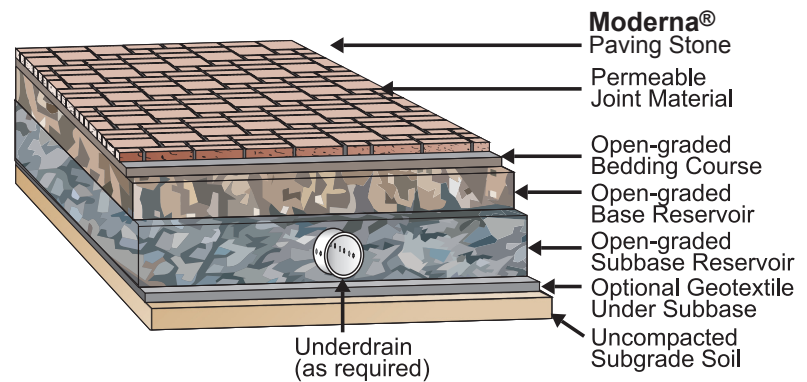

The **Moderna®** Paving Stone is a single-shaped, single-sized stone, that uses a false joint system to produce a multi-shaped and multi-surfaced finished product. This unified stone shape allows for quick and easy installation, saving you time and money on your projects, without sacrificing design.

MULTIPLE COLOURS

The **Moderna®** Paving Stone is available in three natural earthen hues, Beige Mix, Grey Mix and Golden Meadow. Allowing creative choice when designing the perfect permeable environment.

*This does not include the reduction of infiltration by jointing materials or geotextiles.
