

BWS BEST WAY
STONE®

COLOUR & SOLAR REFLECTANCE GUIDE

Design-led colour coordination,
architectural inspiration, and technical
performance guidance for outdoor spaces.

FORM

SCALE

TEXTURE

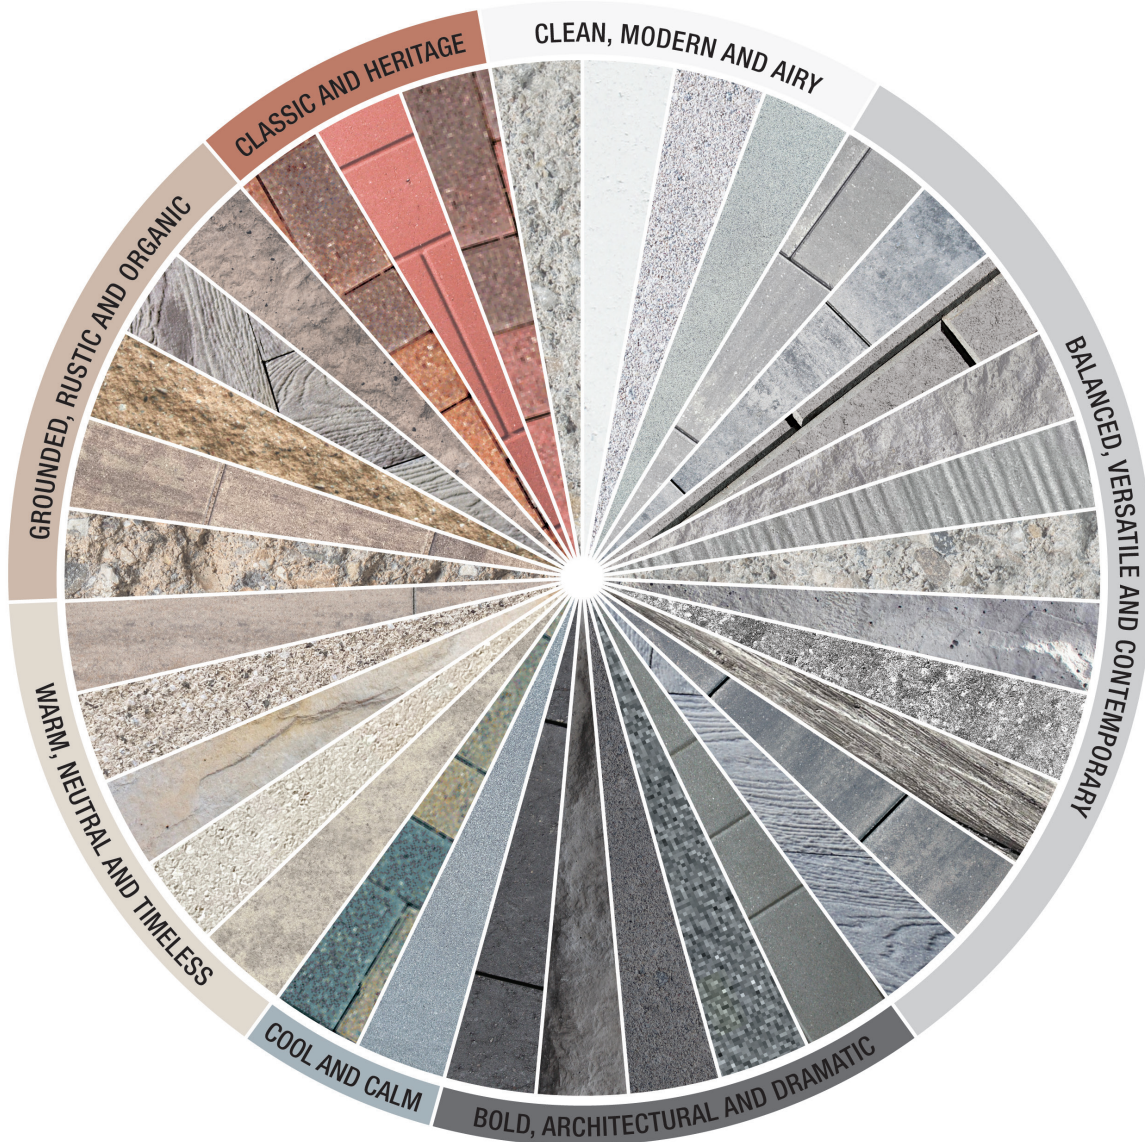

COLOUR

Together, these four elements shape the way outdoor spaces look, feel, and function.

At Best Way Stone®, every product is designed with careful consideration of proportion, materiality, texture, and colour to create outdoor environments that feel balanced, timeless, and connected to their surroundings.

This guide was developed to support homeowners, contractors, architects, and designers in selecting coordinated colour palettes and understanding Solar Reflectance Index (SRI) values across the Best Way Stone product portfolio.

COLOUR

Colour influences the mood and experience of a space. Lighter tones can make an area feel open and expansive, while darker shades create depth, contrast, and definition.

At Best Way Stone, our colour palette was developed to work cohesively across product categories – allowing designers and homeowners to mix textures, scales, and finishes while maintaining visual harmony throughout the project.

Natural aggregates, pigments, and manufacturing processes contribute to subtle variations in tone, veining, and texture. These variations are an intentional part of the character and beauty of concrete products.

Actual product colours may vary slightly from printed or digital representations.

SOLAR REFLECTANCE INDEX (SRI)

Solar Reflectance Index (SRI) measures a surface's ability to reflect solar heat and release absorbed thermal energy.

Products with higher SRI values tend to remain cooler under direct sunlight and can contribute to reducing the urban heat island effect commonly found in dense urban environments.

SRI values are often referenced in:

- commercial projects
- sustainable design initiatives
- LEED-related applications
- rooftop and hardscape specifications

The values within this guide are intended to support the design and specification process when evaluating colour selections across the Best Way Stone portfolio.

	COLOUR	SRI	SR%
	Autumn Hill	38	33.3%
	Brightsand	52	45%
	Buff Brown	21	21%
	Buff Mix	24	23%
	Carrara	30	27%
	Colorado Grey	41	37%
	Eclipse	60	51%
	Glacier Creek	34	31%
	Grey	35	29%
	Grey Mix	23	22%
	Muskoka	39	34%
	Pearl	43	38%
	Red	26	27%
	Red Mix	22	21%
	Salmon Mix	21	20%
	Silver Birch	26	23%
	Silverlight	34	31%
	Summer Mist	41	36%
	White (Basketweave)	51	44%
	White (SR Paver)	82	67%
	Winterborn	21	21%

COLOUR COORDINATION

The Best Way Stone product portfolio was designed to allow coordinated material transitions across slabs, pavers, walls, coping, steps, and outdoor features.

This guide is intended to help:

- identify available colours by product category
- coordinate complementary systems
- simplify specification and design decisions

For final product selection, we recommend reviewing physical samples with your contractor or local dealer, as colour and texture may vary slightly between production runs and natural lighting conditions.

IMPORTANT NOTES

- Colour swatches shown within this guide are for reference only.
- Product colours, textures, and finishes may vary slightly due to natural materials and manufacturing processes.
- SRI values are intended as a design and specification reference only.
- Product availability may vary by region and product category.

For the latest technical documentation, specifications, and product resources, please visit:
bestwaystone.com/resources or contact the Best Way Stone team for project support.

NEED DESIGN OR SPECIFICATION SUPPORT?

Our team can assist with:

- product coordination
- specification support
- colour selection
- commercial and residential applications
